

## Tridium Europe/Middle East/Africa Announces 2009 Niagara Forum

**UNITED KINGDOM- February 5, 2009-** Tridium today announced that it will host its bi-annual Niagara Forum Europe on March 30-31, 2009 at Beaumont House, Old Windsor England.

The Niagara Forum is an open exchange and conference focusing on Niagara-based ideas, techniques and developments, the Niagara Forum brings together integrators, end-users, consultants, developers and resellers--- the Niagara Community--- to share experiences, share knowledge and network with many business associates.

This year's theme, ***Expanding Boundaries***, focuses on where the Niagara Framework is today and where it is heading in the future. From the latest Niagara-based solutions, to enhanced energy and security applications, to the company's open source software platform, the Sedona Framework™ and a host of new functions, attendees will encounter the ultimate educational experience and have the opportunity to network with industry leading systems integrators and end users.

The 2009 Niagara Forum Europe is an opportunity to hear from industry leaders, network with peers and discover how the latest Niagara-based technology solutions are delivering higher performance efficiencies, reducing energy costs, increasing building values, lowering operating costs and creating more comfortable and safer environments.

### **About Tridium, Inc.**

Tridium is the global leader in open platforms, application software frameworks, automation infrastructure technology and device-to-enterprise integration solutions. Our technologies extend connectivity, integration and interoperability to the millions of devices deployed in the market today and empowers manufacturers to develop intelligent equipment systems and smart devices that enable collaboration and communication between the enterprise and edge assets.

The Niagara Framework® is a software platform that integrates diverse systems and devices regardless of manufacturer, or communication protocol into a unified platform that can be easily managed and controlled in real time over the Internet using a standard web browser.

The Sedona Framework™ is the industry's first, open source development framework that provides a complete software platform for developing, deploying, integrating, and managing pervasive device applications at the lowest level. It brings the power of programmable control and the Internet down to extremely inexpensive devices. The Sedona Framework distributes decision

making control and manageability to any device and brings intelligence and connectivity to the network edge and back.

The company is an independent business entity of Honeywell International Inc.
