Tridium, Inc. Signs First European System Integrator!

Richmond, VA, July 11, 2000/PRNewswire/ — Tridium, Inc, the leading provider of internet-based automation infrastructure solutions, today announced that Vageri Electrical & Instrumentation, B.V. has become the first Tridium System Integrator to provide the Niagara Framework™ as an Open System Infrastructure for building automation, industrial automation and energy services in the Dutch Market. The agreement gives Vageri access to Tridium's revolutionary Niagara framework and Java™-object programming and network management tools for LonWorks® and BACnet® products, Java-based controllers, Web Server platforms, and building control applications. Tridium's Systems Integrators offer their integration and networking expertise to commercial, industrial, educational, municipal, and institutional facility owners who want the cost, quality, and flexibility benefits offered by open, multi-vendor, interoperable, Internet-based automation solutions.

"Tridium is delighted to welcome Vageri into the fold of Tridium System Integrators. We have enjoyed rapid success in North America and are extremely excited about the possibilities presented in the European market - we hope Vageri is the first of many new system integrator partners around the globe! The cost and performance advantage of open, interoperable systems coupled with the accessibility and ease of working over the Internet are truly universal customer needs - and the core strength of our offering" said, Jim Hricik, Vice President Corporate Sales.

For more information about becoming a Tridium Systems Integrator, please call 804.747.4771 or visit <http://www.tridium.com>.

Vageri Regeltechniek BV te RIDDERKERK heeft de rechten gekregen van TRIDIUM Inc. om als partner het revolutionaire "NIAGARA FRAMEWORK"pakket te verzorgen voor de Nederlandse markt. Deze INTERNET technologie is toepasbaar in de gebouwenautomatisering, industrieleautomatisering en de energie monitoring markten.
