2010 Niagara Summit Call for Presentations

Tridium announces a Call for Presentations for the 2010 Niagara Summit. Hundreds of attendees will gather in Las Vegas (May 2nd-4th at the Red Rock Resort) and come together to exchange and share experiences on automation infrastructure technology, device-to-enterprise integration and find out about the latest advances on how devices integrate, connect and create interoperable environments.

The Call for Presentations offers participants the opportunity to submit an abstract as a session speaker at one of the industry's most highly respected gatherings, sharing experience and knowledge of developing applications and deploying solutions built around open, interoperability, integration and connectivity at the Summit.

All submissions will be evaluated on the basis of several criteria, including:

- Strategic relevance to the industry
- Timeliness of topic
- Innovation and new approaches to industry challenges
- Tactical focus providing solutions to business and development issues
- Clarity and organization of session, including clearly defined learning objectives
- Avoidance of references to commercial products and services

Selected speakers will be able to demonstrate their expertise with fellow members of the Niagara Community and the industry. Sessions are to focus on one of the three session tracks/audiences listed below:

The Business of the Niagara and Sedona Frameworks

Audience:

- Building Owners
- Sales
- End users
- Systems Integrators
- Control and Equipment
- Manufacturer Executives

Niagara and Sedona Applied - Applications

Audience:

- End users
- Systems Integrators
- Application Engineers

The Development Front - Developing on the Niagara and Sedona Frameworks*Audience:*

Technologists
System Integrators
Application Engineers
Programmers
Developers

The form for submitting presentations is available at www.niagarasummit.com/Call.htm. The deadline for submissions is October 30, 2009.

Additional information about the 2010 Niagara Summit can be found at www.niagarasummit.com or by contacting Julie Hardesty via email at jhardesty@tridium.com. Registration for attending the Niagara Summit will open soon. [Sponsorship](#) and [exhibit](#) opportunities are now available.

About Tridium

Tridium is the global leader in open platforms, application software frameworks, automation infrastructure technology, energy management and device-to-enterprise integration solutions. Our technologies extend connectivity, integration and interoperability to the millions of devices deployed in the market today and empowers manufacturers to develop intelligent equipment systems and smart devices that enable collaboration and communication between the enterprise and edge assets.

The Niagara Framework® is a software platform that integrates diverse systems and devices regardless of manufacturer, or communication protocol into a unified platform that can be easily managed and controlled in real time over the Internet using a standard web browser. By integrating today's diverse building systems such as environmental controls, security, lighting, energy, video, fire and life safety, Niagara is creating better buildings---ones that are smarter, use less energy, are more efficient, have lower operating costs, are safer and contribute to a sustainable environment

The Sedona Framework™ is the industry's first, open source development framework that provides a complete software platform for developing, deploying, integrating, and managing pervasive device applications at the lowest level. It brings the power of programmable control and the Internet down to extremely inexpensive devices. The Sedona Framework distributes decision making control and manageability to any device and brings intelligence and connectivity to the network edge and back.

The company is an independent business entity of Honeywell International Inc.
